“Futuristic and mind-bending elements...The ending is...sheer genius, as is the plot twist...This novel has all the makings of a blockbuster film...”—**Ms. Beth Bruno, past president of CT Author and Publishers Association**

“Street deals and deals, fiascos and undercover labs, subterfuge, high technology, and a story that rises to the top of the political food chain...gripping thriller...satisfyingly hard to put down.”—**Midwest Book Review: Diane Donovan, Senior Reviewer**

It is said that ambition has its price. In *The Apothecary*, modern technology has let loose an unhinged scientist who will stop at nothing to reach his goals.

Dr. Corey Parnevick is a rogue researcher and criminal genius on the run from authorities. With top-secret military-grade technology in his grasp, he is capable of unleashing hell on earth.

This suspense-filled masterpiece explores the heights of human degeneracy and the vile consequences of insane pride. When Dr. Parnevick forms ungodly alliances with a mafia drug lord and the North Korean Intelligence Service, a rash of homicides ensues, and the doctor initiates an unstoppable reign of nanite terror, holding the keys for saving the planet as protective whole cards. Can the mad scientist be stopped, or will a maelstrom of disaster raze the earth to the brink of extinction?

“Marshall Chamberlain has lived a thrilling life...which is how he can write thrillers with a depth and realism that few can match.”—**Featured author in *Foreword Reviews* November 20, 2014, *Foreword This Week* issue**
