There has been a combo quake has happened leaving a rift about 15 miles long. Exposing a cavern full of ancient technology. The ISUP sends John Henry Morgan to head up the expedition . But there are forces at work that want the technology for themselves and as the violence escalates , lives become expendable. You will travel from Prague to Iceland. Crossing the ocean to New York and Washington . Survival is critical for the ISUP and trying to keep the technologies preserved for the benefit of all humanity. Will all come down to who they can trust and if they can stay alive .

Mr Chamberlain takes us on a wild ride. With great twists and turns. You don't really know who can trust and who you can't. There are characters that you think you can trust , the characters that are just evil and they all want to dominate. You want to scream at the kindle when you think you have it figured out , Mr. Chamberlain takes you into a totally different direction. You also get to travel from Prague to Washington D.C and everywhere in between .

John Henry Morgan is a tough ex military man that is the head investigator in the book . He is a hard man and shows it all through the book.

The flow of this book was great every page was full of intrigue and mystery. A twist on every page . I was page turning well into the night on this one. It may seem like a long book , it is a very fast paced book. This is the second book in the series but you can read it as a stand alone .

So if you want a good thriller with lots of intrigue , with a twist of science fiction thrown in . Check out this book . You will like it .

A GREAT BOOK FOR THE DAD IN YOUR LIFE WHO LOVES TO READ
